

Cultural Resources

- Consultation with SHPO concerning NRE structures and ground disturbing construction will continue.
- Rehabilitate the Park Manager's house into a Cultural Resource Center.
- Develop a plan for River Park structures and remnants.
- Expand education and interpretation.

Cultural Resources

- Invasive Species Management*
 - Management strategies will be developed for The Park Complex.
- Deer Management*
 - Management strategies will be developed for The Park Complex.

Designations

- Bird Conservation Area (BCA)*
 - A BCA is designated for all portions of The Park Complex with the exception of the golf courses and developed areas surrounding Rockland Lake.

Park Office

- Improvements are made to bring the office up to current standards.

Bathhouse

- Improvements are made to bring the bathhouse up to current standards and improve patron's experience.

North Pool

- The pool will be rehabilitated and made ADA accessible. A spray park will replace the former children's pool.

Nature Center and Comfort Station

- Phase 1 - Renovate and improve the existing center.
- Construct a comfort station for year-round use near the Nature Center.

Nature Center

- Phase 2 - Construct a classroom/meeting space and playground.

Parking Lot 6

- Comfort station is renovated.

Knickerbocker Road

- Repave portions in need of repair

Picnic Area 5

- Plant additional shade trees and construct fee booth.

Fishing Pier

- Develop and accessible fishing pier.

South Entrance

- Reconfigure the South Entrance roadway. See Figure X

Telephone

- Improvements will be made to the telephone system, bringing it up to present standards.

Electric

- Improvements will be made to the electric system.
- Electric lines should be run below grade to reduce the frequency of power outages.
- Fee booths will be upgraded to include electric.

Education and Interpretation

- Panels will be installed at key points throughout the park and will be linked to smart phone bar code technology for additional information.
- The nature center and boardwalk will be improved to include additional education opportunities.

Trails

Rockland Lake Trail

- A gravel shoulder will be placed on the edge of the asphalt pathway for runners.

River Trail

- Improvements will be made to eroded areas.

Trails

The Long Path

- Improvements will be made to reduce erosion on steep grades and avoid moist areas.

Championship Golf Course

- A new irrigation system is installed.
- The irrigation pond is dredged to increase its capacity.
- Bunkers and cart paths are improved.
- A pole barn is constructed over the tennis court area for storage and golf course maintenance.

Equipment Storage

- A cold storage area will be constructed on the former tennis courts for secure equipment storage.

North Parking Lot

- Parking Lot 1 will be reconfigured to improve patron experience and manage storm water through the use of porous pavement.
- Portion of this lot will be used as a recreational field and for overflow parking as needed.
- Parking lot will be screened from view from Rockland Lake Road through the use of native vegetation and berms.

Wastewater Treatment Plant

- The former wastewater treatment plant will be removed.
- A covered salt storage area will be constructed.

North Maintenance Area

- The heated shop is expanded.
- A wash pad is constructed
- Small covered area constructed for equipment storage.

Parking Lot 2

- Construct a basketball court on the north portion of the lot and/or a playground adjacent to the lot.

Landing Road Parking Lot

- Reconstruct a former parking lot on Landing Road. See Figure X.

Landing Road

- Stabilize culvert

Cultural Resource Center

- The current park manager's house located at end of Landing Road will be converted into a cultural resource center and restroom facility.

Landing Road Pathway

- A paved pathway will be constructed to connect upper Landing Road to the River Trail

Reservable Group Shelter

- A group shelter will be constructed adjacent to Parking Lot 3.
- The associated parking lot will be reservable with the shelter.

South Maintenance Area

- The heated shop area is eliminated.
- Winter maintenance is coordinated from the North Maintenance Area.

South Recreation Area

- Replace the South Pool
- Reconfigure to include space for a wide variety of sports.
- Staff will investigate opportunities for stormwater storage or filtration below ground in the former pool for sports field irrigation. See Figure X.

Executive Golf Course

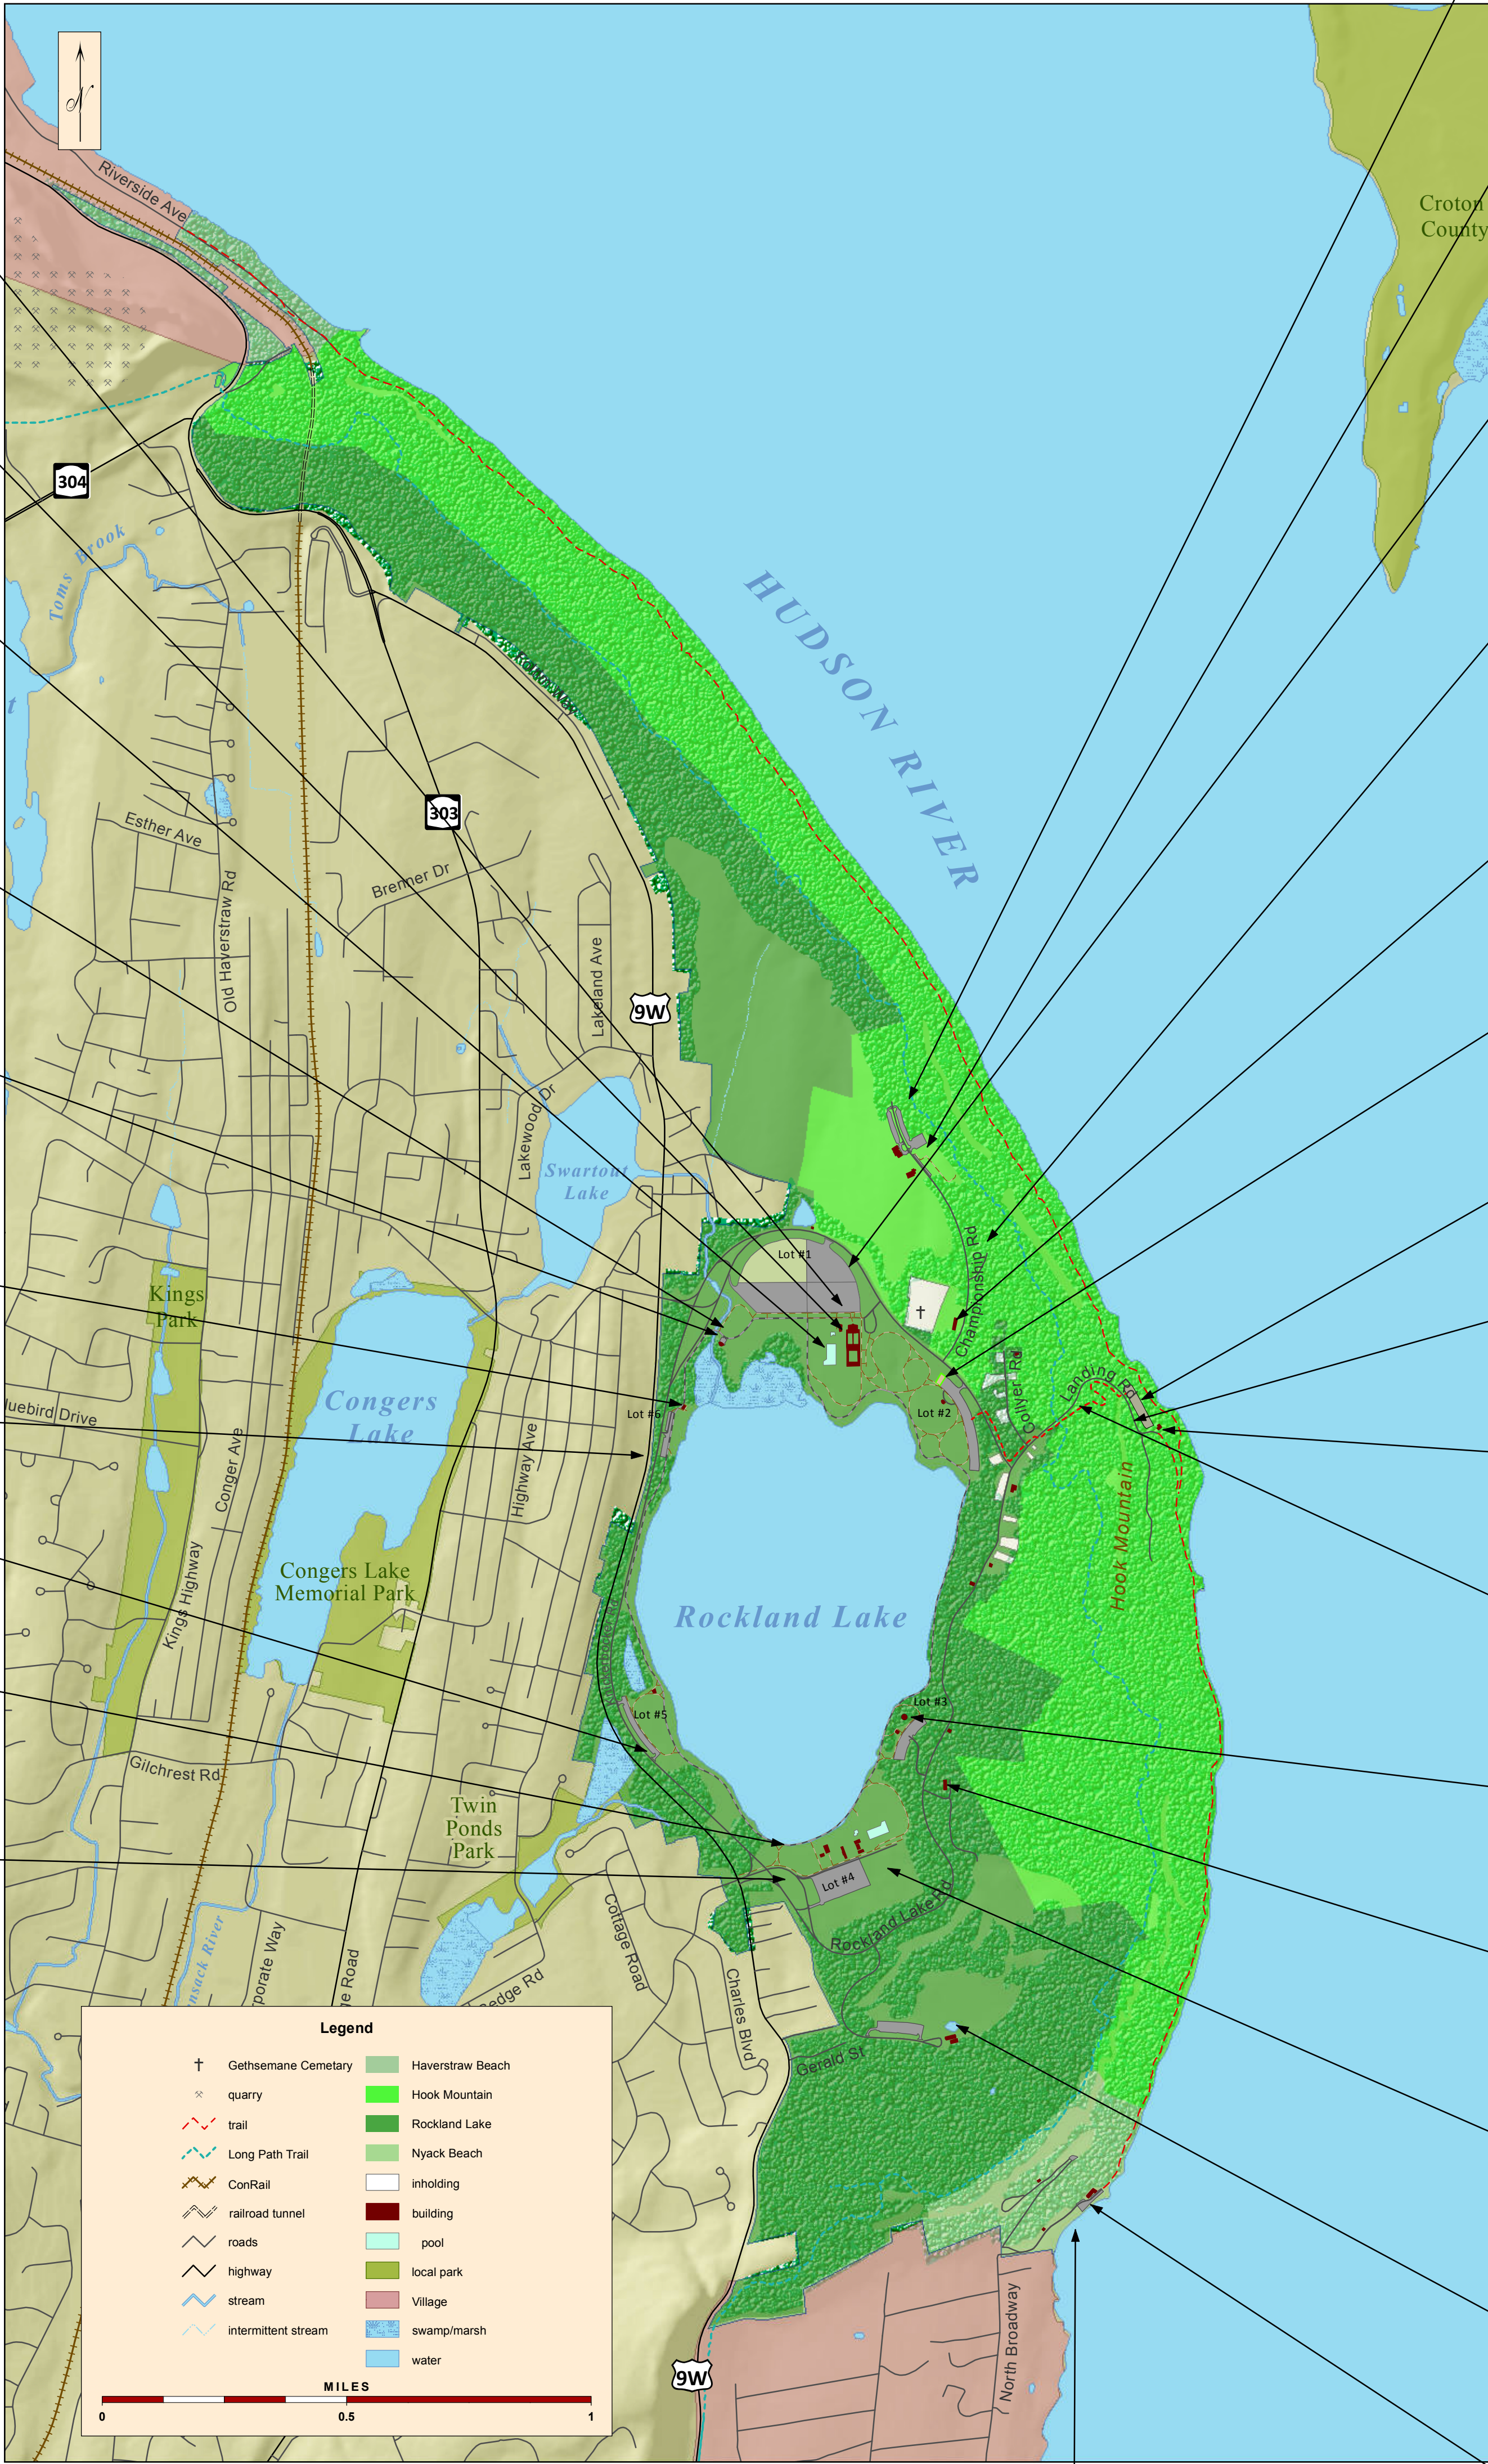

- A new irrigation system is installed.
- The irrigation pond is dredged to increase its capacity.
- Bunkers and cart paths are improved.

Nyack Bathhouse

- Continue to rent to large groups.
- Remove hazard trees above bathhouse.

Nyack Beach

- Seawall and retaining walls - Repair in place.
